NGO's are also given tools to manage their donors relations on their dedicated microsite on Ketto.

Corporates – Employees have the opportunity to start pages as part of social volunteering & cause marketing campaigns (Ketto has tied up with digital agency on a rev share basis).

The Problem

Poor Targetting Results in high costs for advertising

Identify power users on the system to service

Solution (expectation)

- Top Potential Fundraisers (run a regression analysis of past and keep evolving the model to throw out best potential fundraisers)
- Customized best practices for each fundraiser owner.
- Identification of power users among donors.

- Create user characteristic data store & create models on user behaviour based on categories.
- User pattern analysis (on social media) to gauge donation propensity.
- Use above data to increase audience base
- Run targetted ads for high ROI based drip marketing (agency focus)
